# NAGA SAINATH REDDY PALLE

**Lead / Senior React Native Engineer** · iOS & Android · TypeScript · 10+ Yrs Mobile / 6+ Yrs React Native

sainathp.acharya@gmail.com · +91 7013134330

linkedin.com/in/naga-sainath-reddy-palle · sainathpacharya.github.io/sainath.dev

**Hyderabad, India · Open to Global Relocation · Open to Visa Sponsorship**

***Available immediately (prior role concluded March 2026)***

## PROFESSIONAL SUMMARY

Lead / Senior React Native Engineer and Mobile Architect with 10+ years in mobile engineering — including 6+ years specialising in React Native — building cross-platform mobile apps at scale across healthcare, agri-tech, ride-hailing, and productivity domains. Experienced in technical leadership and team coordination: end-to-end greenfield delivery, module-level contributions on large-scale platforms, sprint-driven execution, and cross-functional collaboration with product managers, designers, and QA. Expert in React Native CLI, TypeScript, Swift and Java native module bridging, Flutter, JSI / New Architecture (Fabric), Jest/RNTL, GitHub Actions, and BrowserStack CI workflows. Shipped 15+ production apps across React Native, Flutter, and native Android. Practitioner of Clean Architecture, SOLID principles, and TDD. Strong problem-solving skills at scale. Excellent written and verbal communication skills.

## TECHNICAL SKILLS

**React Native:** React Native CLI · React Navigation v6 · Reanimated 2/3 · Hermes Engine · JSI / New Architecture (Fabric) · Metro Bundler · Expo SDK · EAS Build · CodePush / OTA

**Flutter:** Dart · SDK Upgrade & Migration · Cross-platform UI · Play Store Release

**iOS Native:** Native Module Bridging (Swift → RN) · XCTest · TestFlight · App Store Connect · Apple HIG · Universal Links · In-app Purchases

**Android Native:** Kotlin · Java · Espresso · Google Play Console · Internal Testing Tracks · App Bundle · APK Release

**Languages:** TypeScript · JavaScript (ES2024) · Swift · Kotlin · Java · Dart

**State & Data:** Redux · Zustand · Context API · REST APIs · GraphQL · WebSockets · Firebase (Auth, FCM, Firestore, Analytics, Crashlytics) · AsyncStorage · MMKV · SQLite · Realm

**Testing:** Jest · React Native Testing Library (RNTL) · XCTest · TDD · 85%+ coverage on contributed modules

**CI/CD & DevOps:** GitHub Actions · BrowserStack · Fastlane · App Store Connect · TestFlight · Google Play Console · Sentry · Crashlytics · Firebase App Distribution

**Cloud & AWS:** AWS IAM · IAM Identity Center · Permission Sets & Policy Configuration · AWS Amplify · AWS Workspaces

**Architecture:** Clean Architecture · SOLID Principles · Mobile SDK Design · Scalable Systems · System Performance Optimisation

**Auth & Security:** OAuth 2.0 · JWT · HIPAA-aligned Development · Secure Token Storage · Biometric Auth · GDPR Compliance

**Analytics:** Firebase Analytics · Mixpanel · Amplitude · Sentry Performance Monitoring · Crashlytics

**Leadership:** Technical Leadership · Problem-Solving at Scale · Cross-functional Collaboration · Mentoring · Code Review · Agile / Scrum

**Tools:** Git · GitFlow · Jira · Figma · BrowserStack · Deep Linking · Push Notifications (FCM / APNs) · WebRTC · GitHub Copilot · Cursor · ChatGPT · Claude

## WORK EXPERIENCE

**Lead React Native Engineer** | **Ratna Global Technologies Pvt. Ltd.** *12/2024 – 03/2026 · Hyderabad, India*

- Led mobile engineering team — coordinated module delivery across Collective Health and DMS projects while contributing hands-on in 2-week JIRA-driven sprints.
- Collective Health (React Native): HIPAA-aligned US employee health benefits platform — 50K+ downloads, 4.4★ App Store. Delivered feature modules; wrote Jest + RNTL tests, achieving 85% code coverage on contributed modules.
- DMS Booth & DMS Distributor (Flutter): Delhi Milk Scheme apps — led Flutter SDK upgrade and implemented module updates per client requirements.
- Maintained GitHub Actions CI pipeline integrated with BrowserStack for automated QA build distribution — ensuring every release was device-tested before production deployment.
- Led team PR reviews using GitHub Copilot; mentored engineers on code quality; collaborated cross-functionally with product managers, designers, and QA.
- Gained hands-on AWS exposure: configured IAM and IAM Identity Center, set up permission sets and policies, and provisioned workspaces to support secure, role-based access for engineering workflows.

**Senior React Native Developer** | **Empover I-Tech Pvt. Ltd.** *05/2022 – 12/2024 · Hyderabad, India*

- Owned end-to-end React Native development for enterprise and agri-tech applications serving 100K+ MAU across multiple production apps.
- End-to-end ownership — architected, built, and shipped: Gold Club (50K+ downloads, 4.0★), NSL Subeej Kisan (50K+ downloads, 4.2★), and MCRC App (4.0★) — from technical design through Play Store release.
- Module-level contributions — delivered feature modules across Corteva Farmer Connect (1M+), Corteva Roots (100K+), Corteva Daksh (10K+), ROOTS Employee, NSL Kissan Vikas, and NSL Retail Audit per sprint requirements.
- Built reusable component library and internal SDK-like modules consumed across 5 production React Native apps — reduced duplication, accelerated feature delivery.
- Migrated a large-scale codebase from class components to React Hooks + TypeScript — engineer onboarding time reduced 40%.
- Integrated FCM with APNs via native Swift modules — real-time feature adoption increased 50% within 30 days of rollout.
- Achieved 40% load time improvement via Hermes tuning, FlatList optimisation, and image caching; established Jest + RNTL testing (50%+ critical coverage).
- Conducted React Native architecture workshops — production bug rate reduced 20% over two quarters.

**React Native Developer** | **V-Empower Solutions Pvt. Ltd.** *04/2019 – 05/2022 · Hyderabad, India*

- Developed MeetHour from scratch in React Native — an end-to-end encrypted video conferencing platform, 100K+ downloads, 4.2★; owned architecture, UI, feature development, and App Store & Play Store releases.
- Designed WebRTC native module bridge (Java → React Native) with fully typed JS API; implemented scheduling, digital whiteboard, and in-meeting controls.
- Contributed to Wakuk Passenger and Wakuk Partner (Native Android) — ride-hailing apps — feature modules in Java/Kotlin for booking, trip tracking, and driver/partner workflows.
- Integrated third-party SDKs (analytics, payments, mapping) and REST APIs with caching — load times reduced 25%, offline resilience improved.

**Android Developer** | **Eminosoft India Pvt. Ltd.** *07/2018 – 04/2019 · Hyderabad, India*

- Developed native Android applications in Java and Kotlin with RESTful API integration, SQLite persistence, and Material Design UI.
- Third-party library integrations and UX improvements drove measurable gains in app downloads and user satisfaction ratings.

**Early Career — Android Developer · 2015 – 2018**

- Savithru Technologies (07/2017 – 05/2018): Android apps with Firebase, UI design, and backend integration — Bangalore.
- Aven App Solutions (10/2016 – 07/2017): Native Android (Java), JSON/API integration, and mobile testing — Hyderabad.
- New MEK Solutions (05/2015 – 09/2016): Foundational Android development across fintech, edtech, and SME client projects — Hyderabad.

## KEY SHIPPED APPLICATIONS

**Collective Health — US Employee Benefits Platform (HIPAA-aligned)** 50K+ downloads · 4.4★ App Store · Ratna Global · Team lead + module contributions

***Stack:*** *React Native · TypeScript · Jest · RNTL · GitHub Actions · BrowserStack · JIRA*

Led team contributing feature modules on HIPAA-aligned US health benefits platform. Wrote Jest + RNTL test cases, achieving 85% code coverage on contributed modules. QA build distribution via GitHub Actions → BrowserStack — 2-week sprint delivery.

**DMS Booth & DMS Distributor** 1K+ downloads · Play Store · Ratna Global · Flutter SDK upgrade & module contributions

***Stack:*** *Flutter · Dart · SDK Migration · GitHub Actions · Google Play Console*

Flutter SDK upgrade and module updates for Delhi Milk Scheme government dairy distribution apps (booth and distributor). Led SDK migration and delivered feature enhancements across multiple release cycles.

**Gold Club — NSL Group Agricultural B2B Platform** 50K+ downloads · 4.0★ App Store · Empover · End-to-end development

***Stack:*** *React Native · REST API · Firebase Analytics · FCM Push Notifications*

Architected and shipped a complete B2B productivity and distribution platform for NSL Group (25,000+ retailer network). Built value-added services, community features, and seamless OTA update delivery at scale.

**NSL Subeej Kisan — Farmer Assistant Platform** 50K+ downloads · 4.2★ Play Store · Empover · End-to-end development

***Stack:*** *React Native · TypeScript · Firebase · Multi-language (Telugu / Hindi / English)*

Architected a complete agri-tech app for Nuziveedu Seeds farmer network: live APMC market prices, weather forecasting, farming calculators, barcode product scan, multi-language support, and nearby retailer locator.

**MCRC App — Agricultural Crop Variety Management** 4.0★ Play Store · Empover · End-to-end development

***Stack:*** *React Native · Agricultural advisory · Tablet-responsive UI*

Led development and delivery of crop variety management platform for farmers — improved crop varieties, planting materials, and sustainable farming practices. UI optimised for both phones and tablets.

**MeetHour — End-to-End Encrypted Video Conferencing** 100K+ downloads · 4.2★ App Store & Play Store · V-Empower · Built from scratch

***Stack:*** *React Native · WebRTC · Firebase · Native Module Bridging (Java → RN) · iOS & Android*

Developed entirely from scratch in React Native. Designed WebRTC native module bridge (Java → React Native) with fully typed JS API. Features: scheduling, rescheduling, digital whiteboard, and in-meeting controls. Owned all App Store and Play Store releases.

**Wakuk Passenger & Wakuk Partner — Ride-Hailing Apps** Native Android · V-Empower · Module contributions

***Stack:*** *Native Android · Java · Kotlin · GPS/Location Services · REST API*

Module-level contributions to ride-hailing apps (similar to Rapido/Ola/Uber) — developed feature modules in Java/Kotlin for rider booking, real-time trip tracking, and driver/partner-side workflows per sprint requirements.

*Additional module contributions: Corteva Farmer Connect (1M+) · Corteva Roots (100K+) · Corteva Daksh · ROOTS Employee · NSL Kissan Vikas · NSL Retail Audit · MTracker · PIQYU · Wakuk Passenger · Wakuk Partner*

## EDUCATION

**Bachelor of Technology (B.Tech) — Electronics & Communication Engineering, 2010 – 2014**

Jawaharlal Nehru Technological University Anantapur (JNTU-A), India

## PROFESSIONAL DEVELOPMENT

- Mobile SDK architecture: versioning, API surface design, backwards compatibility, CocoaPods / npm distribution.
- Continuous learning: React Native New Architecture (Fabric / JSI), Hermes engine internals, TypeScript advanced patterns, GDPR / HIPAA mobile compliance.
- AWS: IAM and IAM Identity Center administration, configuring permission sets and policies, AWS Amplify, and workspace provisioning.
- Certification: The Practical React Native Guide [2024] — Academind / Udemy · 28.5 hours · Verified.
- Delivered internal React Native architecture workshops: hooks, Redux, offline storage, deep linking, and testing strategies.

## LANGUAGES

English — C1 Professional · Telugu — Native Speaker · Hindi — B1 Conversational
